

Allstar Magnetics

Magnetic Manufacturing, Assembly & Warehousing

Allstar Magnetics is the leading provider of permanent magnets, custom-wound assemblies and branded magnetic cores and accessories.

Innovative solutions
to meet the exact
needs of your
application.

MAGNETS & ASSEMBLIES
(NdFeB, SmCo & Alnico)

CUSTOM-WOUND MAGNETICS
(Transformers, Inductors, Coils & Electromagnets)

MAGNETIC CORES
(Ferrite, Powder & Amorphous)

EXPERTS IN YOUR INDUSTRY

- Aerospace & Defense
- Medical Equipment
- Oil & Gas
- Instrumentation & Controls
- Energy & Utilities
- Filtration & Separation

PARTNERS IN INNOVATION

PERMANENT MAGNETS

Full inventory of the strongest magnets in the world, with a range of materials and properties. Our team can select the right solution for your unique project needs.

Neodymium Iron Boron
(NdFeB)

Samarium Cobalt (SmCo)

Alnico

Ceramic

Radially Oriented Magnet Ring

Magnetic Assemblies

ASSEMBLY & MANUFACTURING

Precise technical, operational and production capabilities, focused on the most cost-effective manufacturing process. We work with you from design conception & development to final product shipment. Streamline your supply chain with turnkey magnetic assemblies tailored to your project needs.

CUSTOM MAGNETS & ASSEMBLIES

- Material selection
- Component development
- Design for manufacturability
- Prototype to production quantities
- Testing & certification

MAGNETIC CORES & ACCESSORIES

In stock selection of standard cores, bobbins and mounting hardware. Quick turn on custom machining and gapping.

STANDARD CORES, BOBBINS & MOUNTING HARDWARE

LINECARD

MACHINING

Custom CNC machining is the best solution for applications where standard, catalog cores do not quite work. Our Haas CNC 4-axis milling machine can grind to those special shapes and sizes for your custom requirements. Prototypes, small volume and large production runs to meet your needs.

GAPPING & GRINDING

Allstar Magnetics can provide custom gapping and grinding to your required AL value, or to certain inductance using customer supplied test coils. We can also provide rapid turns on prototype gapping.

SUPPLY CHAIN MANAGEMENT

- Wholesale & large inventory stocking arrangements
- Reduced upfront inventory costs lower handling costs
- On demand lead times

SANTRONICS

A Division of Allstar Magnetics

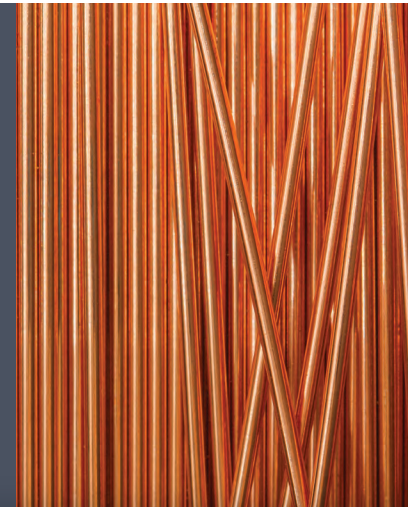

Santronics & Allstar
Partner in Magnetic
Component Design &
Manufacturing

Santronics provides a variety of magnetic assemblies, including transformers, inductors and coils for applications including data transmission, power conversion and power isolation.

CALL OUR ENGINEERING & DESIGN TEAM FOR:

- Designing and developing new solutions for custom situations
- Building custom prototypes from engineering drawings
- Help cross-referencing existing/standard components
- Quotes for any size manufacturing quantities
- SMT or Through-Hole configurations and tolerances
- Recommendations on specialty wires and specifications (e.g., high temperature, LITZ wires, UL recognized wires)
